

## Ride Specifications

**Slope** 7.2°

**Ultra-low water flow** (120 gpm)

**No pool required**

**Minimal infrastructure required**

Why should kids get all the fun? Slipstream® is a waterslide you ride while standing – the first of its kind in North America. Just grab the side rails and glide down on your heels. It's like the sensation of waterskiing, but without all the exertion. Riders control their speed using the running start entrance and exit via a beach entry. Slipstream® is a huge hit with older teens who've outgrown the kiddie rides and adults who want a fun, new way to enjoy the water park without getting drenched. This stand up waterslide is the perfect solution for catering to a wider age range of guests.
